
Income changes cash circulation
20 paired seeds; N=100; income=10% of opening wealth per round when enabled
Fixed payment
Fraction of wealth
Max(fixed, fractional)
No income
Income enabled
Loguniform initial wealth
Wealth Gini coefficient
Loguniform initial wealth
Fraction of contact attempts paid
Uniform initial wealth
Wealth Gini coefficient
Round
Uniform initial wealth
Fraction of contact attempts paid
Round
Cash paths are identical across influence laws and baseline opponent fractions.
Lines: seed means; bands: ±1 sample SD, not confidence intervals. Valid metric range shown.
